Four-dimensional space - Wikipedia The geometry of four-dimensional space is much more complex than that of three-dimensional space, due to the extra degree of freedom. Just as in three dimensions there are polyhedra made of two dimensional polygons, in four dimensions there are 4-polytopes made of polyhedra. The Geometry of the Fourth Dimension and the Space-Time ... The fourth dimension should have 8 three dimensions. If we draw according to this, this is the shape of the 4th dimension. This shape is known as Tesseract. A Tesseract has 8 cubes in it. In geometry, as we increase the number of dimensions, their shapes will get more and more complicated to understand using our eyes.
